

OUR CONTRIBUTION TOWARDS SUSTAINABILITY

CONTRIBUTION TO GENDER PARITY

Global trend	LBF context
Gender parity has a fundamental bearing on whether or not economies and societies thrive. While the representation of women in governance and in leadership roles in the corporate sector has been increasing in recent years, there is still a long way to go in order to achieve equality. Statistics suggest that supporting empowerment as a general rule, corresponds with increased numbers of women in senior roles in the labour market. Furthermore, investing equally to develop both men and women helps to drive economies of scale and improve future readiness of companies.	LBF's does not discriminate on the basis of gender or any other status protected by law. However, a majority of the Company's field sales force remains largely male-dominated. Taking proactive steps to correct this situation, specific gender parity thresholds have been established for every stage of the employment lifecycle.

CONTRIBUTING TO THE UNITED NATIONS SUSTAINABLE DEVELOPMENT GOALS

Global trend	LBF context
The 17 Sustainable Development Goals (SDGs) launched by the UN in 2015 have provided a clear framework for countries and organisations to realign their economic, social and environmental strategies to meaningfully tackle the most pressing sustainability challenges of our time. The fact that the SDG's have provided clear 2030 targets pushes governments and corporations towards the systematic implementation of projects at a granular level	LBF contributes to the SDGs both directly and indirectly. Through our core business of providing financial services, we support individuals, directly enabling them to enhance their financial stability and quality of life. By supporting businesses, LBF is indirectly contributing to economic growth and job creation across Sri Lanka. In addition, by conserving resources and driving diversity, financial inclusion, education, we contribute to the societies and natural environment in which we operate
